

DIONE BS CONCENTRATE

ANTIFREEZE AND ENGINE COOLANT

Description

A high performance engine coolant, which exceeds the requirements of British Standard as well as AFNOR. Antifreeze Dione BS Concentrate has been designed for all year round use to provide 'three way protection' against freezing, overheating and corrosion and is suitable for use in both petrol and diesel engines.

Benefits

Dione BS Concentrate is a mono ethylene glycol based product which has been specifically formulated to be truly universal in its application, providing a high degree of corrosion protection for all engine cooling systems whether they be predominantly of aluminum or ferrous construction.

How to use

Dione BS is a concentrated antifreeze. It must be diluted until a maximum of 50% of its volume with demi water. Do not use tap water.

Performance levels

- BS 6580
- ASTM D3306/D4985
- AFNOR NF R15-601
- SAE J 1034

Typical Properties

		Blue
Code		LUB009072
Density 20°C	Kg/L	1,11-1.14
Reserve Alkalinity	mL	20
pH 25% v/v		7-11.5
pH 50% v/v		7-8
Glycol content	wt%	max. 63
Freezing point 50% anti-freeze	°C	-37
Freezing point 40% anti-freeze	°C	-26
Freezing point 33% anti-freeze	°C	-18
Freezing point 30% anti-freeze	°C	-16
Freezing point 25% anti-freeze	°C	-11
Boiling Point	°C	160 °C
