

DIONE BS READY TO USE

LONG LIFE ANTI FREEZE AND ENGINE COOLANT

Description

Dione BS Ready to Use is a high performance engine coolant, which exceeds the requirements of British Standard BS 6580 as well as AFNOR.

The product has been designed for all year round use to provide 'three way protection' against freezing, overheating and corrosion and is suitable for use in both petrol and diesel engines.

Benefits

Dione BS Ready to Use is a mono ethylene glycol based product which has been specifically formulated to be truly universal in its application, providing a high degree of corrosion protection for all engine cooling systems whether they be predominantly of aluminum or ferrous construction. This coolant is already pre-mixed with water and is ready to use, providing a permanent and guaranteed protection against freezing.

Performance levels

- BS 6580
- ASTM D3306/ D4985
- AFNOR NF R15 601
- SAE J 1034

Typical Properties

		Dione BS 30/70	Dione BS 50/50
Code		LUB008202	LUB008201
Density at 20 °C	Kg/L	1.05	1.07
pH-value		7.7	7.9
Freezing point	°C	-26	-36
Boiling Point	°C	108 °C	110 °C
Color		Blue	Blue
